

VIRTUAL TESTING HOW TO GUIDE

OCTOBER 2024

INTRODUCTION

We want to ensure skaters can progress through their skating journey as smoothly as possible – and for that, our test format needs to evolve. We are therefore excited to introduce this pilot for virtual tests.

While we aim to eventually be able to offer virtual tests as an option for all skaters and all test types, we are starting our virtual test pilot with Skills Tests for skaters who have been waiting for tests the longest or who have struggled with test accessibility.

This guidance is only for skaters who receive an invitation to complete a virtual test using our new system in this early stage of its introduction.

RECEIVING AN INVITATION

Skaters identified as eligible for a virtual Skills Test will receive an automated email when their test has been selected for Virtual Testing. To complete a virtual test, they will need to record videos of themselves completing their Test exercises (guidance provided below) just as they would for an in-person test, then upload them online to be judged.

Please note, while we pilot this new system we are unable to take individual requests for virtual tests, and we ask that skaters do not contact the BIS Office regarding this as we will not be able to accommodate such requests at present – only skaters receiving a direct invitation for a virtual test will be able to take part for now.

We plan to slowly expand the number of virtual tests we offer and will keep the community updated on progress.

FILMING YOUR VIDEO SUBMISSIONS

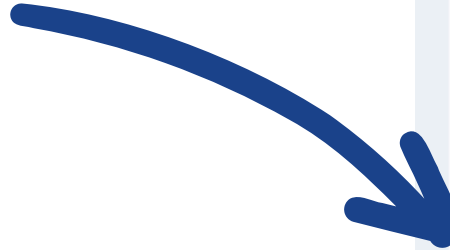

The following guidelines must be followed for your video submissions to be accepted and judged:

- Videos should be filmed from the judges' perspective, just as they would watch the skater in a test session. Therefore the camera should be operated from off the ice with the skater positioned in the centre of the frame, with a starting position facing the camera.
- The video must be filmed in landscape with the skater as the main focus of the video at all times.
- The skater must be in full focus at all times of the video in order for the judge to clearly see their whole body (including blades).
- Videos must be recorded on a quiet session (no more than 10 others on ice at the same time) and other skaters must not obstruct the view of the test skater for more than one second at any time.
- Videos recorded for Skills 5, 6, 7 & 8 tests must be conducted at rinks of 40 metres or larger (in line with our current test session rink guidelines).
- Audio is to be recorded all the way through each recording.
- If music is required for the test then this must be able to be clearly heard throughout the entire performance.
- Where possible, consideration should be taken for the cleanliness of the ice - earlier in a session following a resurface is preferred.
- For Skills Level 1-7: The videographer is to stop recording after each exercise and must be uploaded separately.
- For Skills Level 8: One full recording should be made from start to finish with no pausing at any stage.

Failing to follow any of the above guidance may result in your submission being rejected and require you to record new videos. This will not incur any additional cost, however may delay the timeline for judging and you receiving your results.

UPLOADING YOUR VIDEO(S)

In your invitation email you will find a link to the online submission page, where you will need to upload your test videos when they are ready.

- full/whole body (including blades) to enable them to identify the quality of edges, choreography etc. (not an overview of the ice surface with the camera not following the skater)
- Test must be skated on quiet session (No more than 10 others on ice surface at the time of the test) and other skaters must not obstruct the view of the test skater for more than one second otherwise test will be void and re-test assigned to the test
- Consideration of the cleanliness of ice – earlier in a session following a resurface is preferred
- Audio to be recorded all the way through the recording/footage of the test
- **Skills 1-7** – Videographer to stop recording after each exercise so that the recording is not too long for downloading purposes
- **Skills 8** - One full recording from start to finish (no pausing at any stage or test will be void and re-test assigned to the test)
- Correct video must be uploaded to the corresponding box

Upload Performance Recording(s)

Please note we will communicate the results when they are available, please allow up to 28 days.

Kind regards,

British Ice Skating

This link will take you to the 'Ice Test' site, to this upload submission page.

UPLOADING YOUR VIDEO(S)

On the Ice Test upload page, you will find a blue upload button for each exercise of the Skills Test you have applied for (or a single upload button for Skills 8 Tests).

Clicking this button will allow you to select the file you wish to upload for this exercise.

Video Submissions can be rejected due to low quality.

The following may cause a video to be rejected due to poor quality, as judges will not be able to accurately assess the skater's performance:

- Shaky or out of focus video
- Filmed from too far away/not zoomed in enough
- Skater is not in frame
- Other skaters pass between the camera and skater, obstructing the view for the judge

Substandard video recordings will be rejected and new recordings will be requested. Judges will submit the reason for their rejection and this will be communicated to the skater via email so they can improve the video quality for their second attempt.

This will not void their test application or incur an additional cost.

HOW WILL YOUR TEST BE JUDGED?

Your video submissions will be judged by our qualified Skills Judges - these are the same judges who would conduct an in-person test session.

Each virtual test will be judged by three judges before a result is processed, and the final result will be based on a majority score; two judges must pass the test for you to receive a pass. These scores will then produce a PDF which will be accessible to the skater and their coach in their result email.

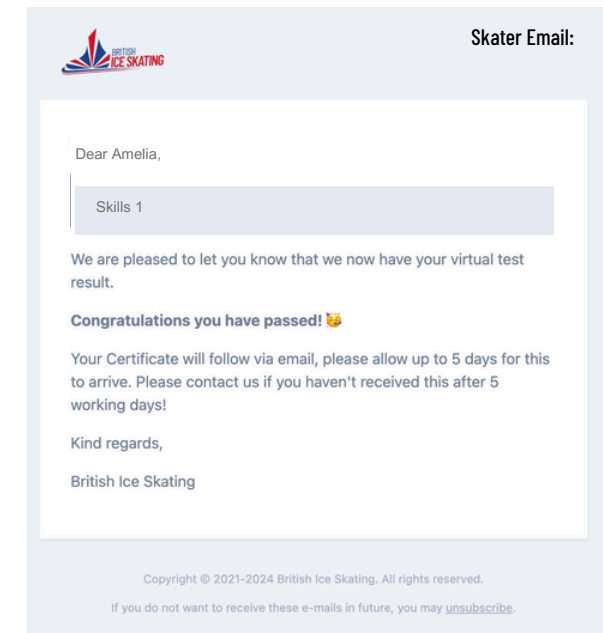

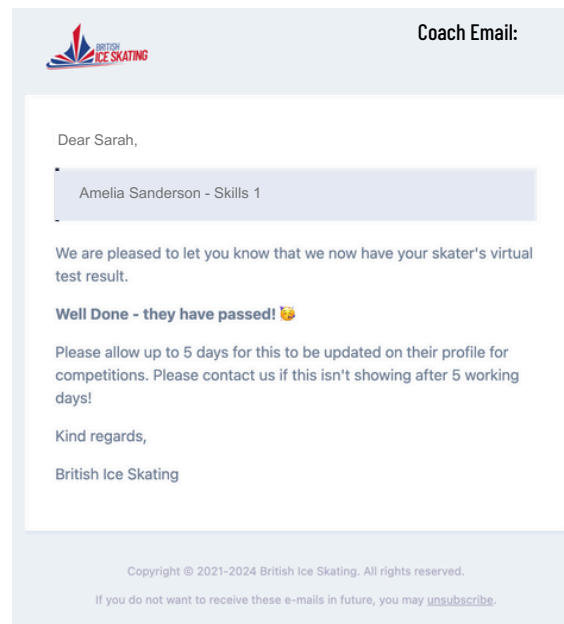

Skaters should expect to hear the result of their test within 28 days of upload.

RECEIVING YOUR RESULT

You and your coach will receive the result of your test, as will the BIS Office. Pass results will be automatically processed and added to your Sport:80 profile by BIS staff, at which point you will receive your test certificate.

Please allow up to five working days for this process to take place.

Please see the below examples of a pass result email:

Does my virtual test have to be filmed in one day?

Your exercises can be filmed on different days (apart from Skills 8), if necessary, but each exercise must have one continuous video with no cuts.

How should I dress for my virtual test recording?

We recommend appropriate black training gear or a test dress. You can wear your hair in anyway as long as this doesn't obstruct your test or inhibit health and safety on the ice.

Who should film my test?

Anyone can carry out your filming, though we recommend that your own coach or another coach from your rink films your test as they are most likely to understand the standard of footage judges will require.

Will I get a re-skate?

No - with virtual tests, no re-skates will be permitted; results will either be a pass or a retry. If your video(s) are rejected for quality reasons, however, you will have the ability to record new ones and upload these again at no additional cost.
